OVERVIEW

Thanks to this excellent kit you can **motorize your Modula slider**. In a handful of minutes, you can upgrade your slider and make extremely fluid slides; don't worry about power feeding problem: a battery pack with **20-hour working** time is integrated in the controller.

TWO MOTORS

Two motors are included with different gear ratios: **55 R.P.M.** and **09 R.P.M.**, easily interchangeable by the operator with no need of any tools. The motor can quickly be released from the slider in caso of manual use.

CONTROLLER

The operating essence of Motion Control! A device which completes electronics and long-lasting accumulators, which has two functions, Tracking Shot and Time Lapse with 3 different operating modes: **Loop, Sync, No Stop**.

TRACKING SHOT

Extremely precise and fluid tracking shots; opportunity to manage speed, direction, acceleration and slowing- down ramps. Tracking shot can automatically end at the track end or can detour in an endless movement (Loop). Perfectly synchronized tracking shots: START and STOP of the recording synchronized with the tracking shot beginning and end (Sync), or opportunity of continuing the recording (No Stop).

TIMELAPSE

The motion uses **SMS (Shoot Move Shoot)** Technology that allows to synchronize the track move with the Reflex shutter. This feature gives the possibility to use any exposure time, with no worry about blurry. The pause between a move and another can be set in a range from 1 second to 99 hours thanks to an intervalometer integrated into the controller.

Amazing precision:THE MINIMAL CARRIAGE SHIFT IS 0,01 MM.

STOP / MOTION

Easy Stop Motion mode: Give a new movement of camera at your Stop/Motion Videos

MACRO

Amazing Macro Tracking Shots with the lowest speed of 2mm/Sec.

HIGHLIGHTS

- 100% Made in Italy
- Double Motor Included
- Motion Control Plus
- Battery Included
- Shoot Move Shoot Technology
- Tracking Shot and TimeLapse
- Manual and Motorized Motion
- 2 YEAR WARRANTY

IN THE BOX

- Motion Control Plus
- Controller Plus
- Motor 55
- Motor 09
- Battery
- Battery Charger
- Belt 94,5" (240 cm)
- Cordura® Bag
- Set-up Keys
- Instruction Manual

WARRANTY

2 YEAR WARRANTY

SPECS

Battery Life	Over 48H in Timelapse and 22H in Video mode
Modes	MULTIMODE: Sync, Loop, No Stop
Motor 55 Min Speed	0,94 in/s (24 mm/sec)
Motor 55 Max Speed	3,93 in/s (100 mm/sec)
Motor 55 Horizontal Load	± 22 lb (10 kg)
Motor 55 Vertical Load	± 2,5 lb (2,5 kg)
Motor 55 Minimum Shift	0,15" (0,4 mm)
Motor 09 Min Speed	0,078 in/s (2 mm/sec)
Motor 09 Max Speed	0,39 in/s (10 mm/sec)
Motor 09 Horizontal Load	± 66,1 lb (30 kg)
Motor 09 Vertical Load	± 15,4 lb (7,0 kg)
Motor 09 Minimum Shift	0,002" (0,06 mm)
